EDUCATION

MallaReddy College of Engineering and Technology

B.Tech in Computer Science and Engineering (AI & ML) | CGPA: 8.1

Sep 2023 – Jul 2027

Turito College

Intermediate Education (MPC) | Percentage: 78

Aug 2021 – Mar 2023

Geetanjali High School

Secondary School Education (SSC) | CGPA: 10

Mar 2021

EXPERIENCE

Infosys Springboard

Intern

Feb 2026 – Present

- Performed industry trend forecasting using market trends and competitor analysis.
- Conducted competitive positioning analysis relative to industry benchmarks.
- Generated real-time strategic opportunity alerts for decision-making.

Swecha Organization

Intern – AI Developer

Jun 2025 – Aug 2025

- Worked with Python to build real-world AI applications.
- Implemented Retrieval-Augmented Generation (RAG) systems.
- Studied Transformer architectures including GPT and BERT.

Indic AI (Swecha Corpus App)

Contributor — Bug Fixing and Feature Improvements

june 29th - aug 2025

- Identified and resolved 10+ performance and usability bugs in the Swecha Corpus App, improving application stability by 30%.
- Enhanced UI/UX design to provide a smoother and more intuitive user experience.
- Optimized application code and database queries to reduce response time by 20%, improving data retrieval efficiency.

PROJECTS

AI-Fireguard with Blockchain Technology

Flask, React, Machine Learning, Ethereum Sepolia, Web3.py, SQLite

- Built an AI-based firewall system to detect cyber attacks.
- Developed a real-time monitoring dashboard using React.
- Integrated Ethereum blockchain for secure attack logging.
- Implemented backend APIs using Flask.

Neuro Lung Cancer Detection

Python, TensorFlow, Flask, OpenCV, NumPy, HTML/CSS

- Developed a CNN-based deep learning model for lung cancer detection.
- Automated medical image preprocessing and prediction.
- Implemented Grad-CAM to highlight tumor regions in scans.

Dense Passage Retrieval (DPR) for AI Search

Python, PyTorch, HuggingFace Transformers, NLP

- Implemented a Dense Passage Retrieval system using transformer-based encoders to retrieve semantically relevant documents for user queries.
- Built query and passage embedding pipelines using BERT-based models for efficient vector similarity search.
- Integrated DPR with a retrieval pipeline to improve search accuracy compared to traditional keyword-based methods.
- Applied the system in a Retrieval-Augmented Generation (RAG) workflow to enhance AI response quality.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C

Tools: GitHub, VS Code, Jupyter Notebook, Excel, Unity

Databases: SQL, MongoDB

Core Subjects: Data Structures & Algorithms, Artificial Intelligence

CERTIFICATIONS

- **Swecha:** Summer of AI Internship
- **STTAR:** Transforming Higher Education with Google Gemini
- **Techgyan Technologies:** GEN-AI Certification
